- -• Professional communication in the Russian and English languages.
- -• Teamwork organization and management.
- -• Team strategy formation for goal achievement.
- -• Cross-cultural competence.
- Internet discussion «Formation and Development of Leadership Qualities: Managerial Skills; Sociocultural Environment».

STUDENTS' REVIEWS

👃 MARIA ISTRAKOVA, RUSSIA

I got the Bachelor's degree in "Linguistics" and decided to continue studies at the Institute of Foreign Languages of RUDN University, but changed my profile and chose the Master's degree programme "Psychological and Pedagogic Principles of Organizational and Managerial Activities".

Due to the combination of the courses at the Institute of Foreign Languages I understood the meaning of the interdisciplinary approach to studying. Here I've got acquainted with serious science thanks to participation in international scientific conferences and immersed myself in extremely useful practical classes that showed us all aspects of our future professional activities. Such courses as "Methodology and Methods of Psychological and Pedagogic Research Management" and "Scientific Research in Psychological and Pedagogic Professional Activities" enabled us to conduct scientific research for our Master's thesis. One of my favourite subjects has been "Legislative Framework of Education". It helped us to understand the legal system of the Russian Federation.

Teachers approach tasks creatively: we often take part in team project work, case studies and write essays. The foreign language is also taught at a high level.

All our teachers are highly qualified specialists, and we know that we can always contact them on any issue related to the educational process.

👃 AHMED AL-HATWA, YEMEN

My name is Ahmed Al-Hatwa. I am from Yemen. I came to Russia in August 2010 thanks to the students' exchange programme. I took the Master's degree programme "Psychological and Pedagogic Principles of Organizational and Managerial Activities" at the Institute of Foreign Languages of RUDN University and graduated in 2017. I had taken a national test in Yemen. Due to the results of the test, young people have an opportunity to participate in the national educational programme. It enables the students to study abroad. I had been sent to RUDN.

Students from all over the world study at RUDN University. They all are absolutely equal, and I didn't feel an alien. In the beginning it was, of course, difficult to live far from my parents. It was not easy to study – a lot of homework, new subjects, the educational process held in the Russian language. There is a tradition in accordance to which senior students help newcomers to adapt to the new situation. RUDN students from Yemen helped a lot. I did the same later: helped the students to move, to get acquainted with the University and Moscow. I managed to overcome all the difficulties and I am proud to say that I've learned not only the Russian language but also a lot of professional subjects at the University. Thanks to this knowledge I am a well-qualified manager-psychologist. The obtained knowledge in pedagogy will be useful – I may work as a teacher some day, I will have children of my own, family building is the main life purpose for Arabs. As far as the knowledge in psychology is concerned, it is extremely important for every modern human being. In this complicated world we should understand ourselves and other people, make the right choice in life.

👃 SUN DANYANG, CHINA

66 I am one of the first foreign graduates of the unique Master's programme "Psychological and Pedagogic Principles of Organizational and Managerial Activities" of the Institute of Foreign Languages of RUDN University.

When I arrived in Moscow, at RUDN, I could hardly speak Russian. Having finished the preparatory faculty, I entered the Institute and chose the only Master's degree programme in pedagogy at RUDN, then completely unknown. At the beginning of the first semester, I had a terrible feeling: I didn't know anything, I didn't understand anything.

I think the most difficult problem for foreign students is the language problem. In my opinion, the best solution is to learn the discipline and the language at the same time.

At the IFL, everyone understands that you can't learn a language at once, and everyone – my dear classmates and kind teachers helped me at that difficult time. I held on and graduated. In my second year, during an internship, I worked as a teacher of Chinese at our Institute, and at the same time quickly improved my knowledge of Russian.

I am grateful to the Institute, I am grateful to the teachers and fellow students who constantly helped me throughout my studies. Not only did I get a high-quality education and become fluent in Russian, even in the professional sphere, I found the most important thing for me – a great friendship.

Now I work as a social teacher and psychologist. I teach the subjects "Fundamentals of Special Pedagogy", "Sensory Integration Training for Children with Disabilities" and "Basic and Pedagogical Psychology" at the Tongren preschool education college.

HEAD OF THE PROGRAMME

NATALIIA SOKOLOVA

Director of the Institute of Foreign Languages of RUDN University, PhD in Philology, Professor, Head of the Department of Foreign Languages in Theory and Practice, Academician of International Teachers' Training Academy of Science.
