

SOCIAL PROCESSES AND SOCIAL MANAGEMENT

PART-TIME EDUCATION

M.A. IN AREA STUDIES

PROGRAM ADVANTAGES

- ✓ The program “Social Processes and Social Management” optimally implements a synthesis of disciplines of management, economics and law.

Successful development of these disciplines gives an advantage in an ever-growing competition for obtaining status in public administration and international management.

- ✓ The program is aimed at the formation of sustainable integrated skills, necessary for professionals to succeed, both on state and municipal service, and in international organizations.

Along with getting a solid base for working in social process management of great difficulties, students will acquire the necessary skills of system thinking, which important for informed decision making with significant impact in both the public and private sectors.

- ✓ Unlike others, the program involves combined training in work in specialty, which, on the one hand, allows for more productive master subjects, and, on the other hand, apply the acquired knowledge in their labor activity.

This combination of theory and practice will allow you as acquire project management skills, as master leadership methods to lead management teams of any scale.

- ✔ Implementation of the program “Social processes and social management” provides the participation of professors with extensive practical experience in the highest state bodies and municipalities of the capital.
- ✔ As a result of the successful development of the Master’s program “Social processes and social management” graduate receives a master’s degree domestic sample, as well as confirming the qualification of a Master’s Diploma Supplement adopted in European countries, which is a strong argument for the prestigious position in the systems of state and municipal services, as well as management of domestic and international organizations.
